| 5  | (1) Equipment for the blood bank (namely storage and preservation solutions).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 9  | (2) Medical equipment and instrumentation for infusion, transfusion, dialysis, gas supply, feeding, analysis, diabetics, cardiac surgery, (namely all kinds of tubes for medical use, namely laboratory glass tubes, test tubes), analysis equipment and diagnostic equipment (namely all kinds of plastic components namely well plates for drug screening use) drip counters, drip counter bottles; computer software for use in diagnostic, monitoring and analysis of clinical data obtained from urological equipment; physical, chemical, optical and electric equipment (namely diagnostic, analytic devices, namely data storage systems for recording dialysis therapy from measuring catheters, computer software for diagnostic, monitoring and analysis of medical data obtained from measuring catheters).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 10 | (3) Medical equipment and instrumentation for infusion, transfusion, dialysis, gas supply, feeding, analysis, diabetics, cardiac surgery, (namely all kinds of tubes for medical use, namely medical drainage tubes, plastic blood collection tubes, tracheostomy tubes) and general medical products, namely catheters and catheter systems for the drainage of liquids, for measuring pressure or oxygen, for the measuring, display, transfer and analysis of physiological parameters, aerosol atomisers, analysis equipment and diagnostic equipment (namely all kinds of plastic components namely catheters, pressure measuring catheters for neuromonitoring,) drainage tubes, electrodes, irrigators, probes, nebulisers, water bags, nebulisers for medical purposes, respirators and accessories for artificial respiration (namely tubes, full medical sets for artificial respiration use, and components, namely, mouth pieces, nebulizing chambers or parts therefor, filters, valves), containers for the administration of drugs (namely plastic storage containers, medication containers), blood analysis equipment for use in blood diagnostic devices (namely well plates, storage chambers), blood pressure monitoring devices, sensor catheters, suture materials (namely material or components made of polypropylene prepared for implantation use, namely urological catheters for drainage use and implantable catheters for dialysis use) defibrillators, dialysis equipment (namely, bags, tubes, connectors, chambers), gastroscopes, lavage equipment, inhaling apparatuses (namely respirators, masks), cannulas, catheters, trocars, medical equipment and instrumentation (namely all types of components which |

**Documents**[View documents](#)

are assembled to medical equipment and instrumentation, namely medical tubes, plastic or metallic components, sensors, disposable tubes and components), medical guide wires, urological equipment and instrumentation (namely urine collecting or drainage means, and diagnostic devices and aids in the field of urine diagnostic); Medical equipment and instrumentation in the field of veterinary medicine (namely fertilisation implants, catheters); Measuring catheters for various medical parameters, surgical and medical instruments, equipment and apparatuses for dialysis therapy (namely all types of components which are assembled to medical equipment and instrumentation, namely infusion sets assembled of tubes and connectors, tubes, plastic or metallic components, sensors, disposable tubes and components), surgical, medical, dental and veterinary instruments and apparatuses, parts and accessories therefore (namely clamps, clasps, bags for medical liquids, pumps, syringes, needles, catheters, cannulas, plugs and tubes (namely all kinds of tubes, components and sets for medical use namely tubes or sets for infusion, transfusion, gas supply, dialysis and connectors, plugs or port systems)), stents, adapters, connectors, and connections to connect different systems of tubes, tube device interfaces, blood filters and blood bags for transfusion medicine and haematology, equipment and disposable articles for haematology and transfusion medicine (namely transfusion bags, tubes and connectors); empty bags, bag compressors, equipment for auto-transfusion and accessories (namely sets assembled of medical tubes, connectors, chambers for blood purification and plasma sequestration, containers to collect blood, suction tubes), equipment for the blood bank (namely empty bags, tube clips), physical, chemical, optical and electric equipment (namely diagnostic, analytic devices, namely sensors); Medical equipment and instrumentation for infusion, transfusion, dialysis, gas supply, feeding, analysis, diabetics, cardiac surgery, (namely all kinds of tubes for medical use, namely intravenous feeding tubes, medical drainage tubes, plastic blood collection tubes, tracheostomy tubes).

- 17 (4) Plastic materials as semi-finished products in the form of pipes, tubings, blocks, rods, profiles and mouldings; artificial and synthetic resins [semi-finished products], plastic fibres, not for textile purposes.

**Services (Nice class & Statement)**

- 35 (1) Business management, business management consultancy, business management consultancy services; Procurement services for others, namely purchasing goods and services for other businesses, order acceptance, supply order service and invoice settling, also within the context of e-commerce; Marketing research for third parties, opinion polling, merchandising, public relations, on-line advertising in a computer network; Direct mail advertising by means of flyers, brochures, printed matter, samples; Organising trade shows in the field of

- medicine and medical technology; Auctioneering, also on the Internet; Rental of advertising space, also on the internet (banner exchange).
- 41 (2) Publication of publisher's and printer's products in electronic form, also on the Internet, publication of periodicals and books in electronic form, also on the Internet, online publication of electronic books and periodicals; organising of conventions, meetings, exhibitions in the field of medicine and medical technology.
- 42 (3) Services in the medical field for hospitals, doctors and patients, namely research and development of medical products, planning and implementing clinical studies to evaluate medical devices and components, consultation on the use of medical devices and components, analysis of measuring data and technical support of diagnostic devices, a chemical laboratory.
