Goods (Nice class & Statement)

- 4 (1) Renewable energy, namely, solar energy, wind energy and geothermal energy.
- 7 (2) Wind-powered electricity generators.
- 9 (3) Photovoltaic installations for generating solar electricity; Solar thermal installations for generating thermal energy; Life safety systems; Renewable energy systems; Community-based energy systems; Cogeneration energy systems; Mechanical and electrical systems for buildings; Lighting controls; Controls and automation equipment for mechanical and electrical systems for buildings.
- 11 (4) Heating, ventilation and air conditioning apparatus; Geothermal based HVAC units; Geoexchange based HVAC units; Lighting fixtures.

Services (Nice class & Statement)

- 37 (1) Engineering, retail sale, installation, and maintenance of renewable energy generation systems, mechanical systems, electrical systems, community-based energy systems, and district and shared energy systems; Installation and maintenance of solar photovoltaic installations, solar thermal installations, energy cogeneration systems, and geothermal energy installations; Plumbing services; Gas fitting services; Installation and maintenance of heating, ventilation, and air conditioning systems, power distribution systems, communication systems, and life safety systems; Building operation and maintenance services; Installation and maintenance of control and automation systems for mechanical and electrical systems for buildings; Supply and installation of electrical systems.
- 39 (2) Distribution of renewable energy; Energy distribution services.
- 40 (3) Generation of electricity from solar energy; Generation of energy from biomass; Generation of renewable thermal energy; Generation of renewable energy from wind; Energy generation services.
- 42 (4) Mechanical engineering services; Indoor air quality measurement and monitoring services; Technical consultation and engineering services in the field of renewable energy; Design of mechanical and electrical systems; Building envelope design; Consultation in the field of building energy optimization; Consulting and computer modelling services in the field of net zero energy design; Conducting feasibility studies in the field of energy services and renewable energy technologies;

Technological planning and consulting services in the fields of renewable energy resources and energy usage.

Claims

Used in CANADA since at least as early as February 2007
