RAILONE

RAIL ONE

1

Goods (Nice class & Statement)

- 6 (1) Railway material of metal, namely, metallic materials for railway tracks, materials of metal for railway construction, metal railway crossovers; sleepers of metal, namely railway sleepers; building construction material in the nature of panels of metal, cast iron for use in hydraulics, sanitation, road systems and buildings, cast iron material for railway tracks, metal reinforcement sheets for building, metal building flashing, metallic materials for railway tracks; common metals and their alloys; goods of common metal and their alloys for building or goods of common metal and their alloys, namely prestressing and reinforcing steel, anchoring and connecting elements, rail fasteners; metal transportable buildings, namely portable mobile office and production buildings and weather protection shelters; cables of metal, non-electric, metal wire ropes, non-electric; ironmongery, small items of metal hardware, namely nuts, screws, nails, bolts, snap hooks; pipes and tubes of metal, namely, drainpipes and draitubes; tubing of metal for use in railway roads, railway tracks, road systems and buildings; beams of metal; ingots of common metal; fittings of metal for building; building materials (metal -) in the form of sheets; cotter pins of metal; reinforcing materials, of metal, for concrete; metal fibers for concrete; shuttering of metal for concrete; sheets and plates of metal; wire rope; brackets of metal for construction of road systems and buildings; railway sleepers of metal; railway points of metal; metal rail connectors; latticework of metal; metal staples for construction or industrial use; power line pylons of metal, pylons of metal; cable junction sleeves of metal; nuts of metal; nails of metal; metal lintel; poles of metal for electric power lines, namely, power line pylons of metal, pylons of metal; drain pipes of metal; eye bolts; steel buildings; hardware pins of metals; posts of metal for power lines; beams of metal; shims.
- 7 (2) Machines and machine tools for concrete processing, namely, machines for production of concrete ties, concrete mixers, concrete pumps, concrete finishing machines, concrete stressing and de-stressing machines, concrete curing machines and chambers; machines for the manufacture of precast concrete parts, namely railway sleepers and precast slabs for roadways and special applications; motors, other than for land vehicles namely motors and engines for concrete processing and rail road ties production; machine coupling and transmission components (except for land vehicles).
- 17 (3) Plastic fibers for concrete.

Documents

[View documents](#)

19 (4) Pitch, tar, bitumen and asphalt; building materials, not of metal, namely anti-decay wood, building glass, gravel, sand, cement; concrete sleepers, namely concrete track and turnout sleepers; plastic sleepers for tracks and switches; concrete components, namely prefabricated slabs for roadways and special applications; railway sleepers, not of metal; masts, not of metal, namely, non-metal utility poles, concrete poles for use as building materials; posts, not of metal, for power lines; rigid pipes, not of metal, for building, namely cement, concrete, clay, plastic, PVC pipes; posts, not of metal, namely cement posts, wooden posts; cement slabs; non-luminous and non-mechanical traffic signs, not of metal; nonmetallic transportable buildings, namely portable mobile office and production buildings and weather protection shelters.

Services (Nice class & Statement)

37 (1) Building construction for rail infrastructure projects for ballasted tracks and ballast less tracks; structural installation/construction of rail track systems [slab track] on concrete and asphalt surfaces; installation services relating to tracks and rails; machinery installation for concrete processing and rail road ties production, maintenance and repair; repair of tracks and railways; construction consultancy in the field of railway infrastructure.

42 (2) Engineering consultancy services in the field of railway infrastructure; engineering surveying services, namely rail road surveying; research in the field of technology in the nature of development of new technology for others in the field of railways and rail track systems and mechanical engineering research; conducting technical project studies, namely, conducting of feasibility studies in the field of new technologies in the field of railway infrastructure, especially trackwork; technical planning and development of ballasted and non-ballasted tracks; technical construction drafting within the framework of or for the dimensioning and manufacture of rail track systems.

Claims

Priority Filing Date: November 16, 2021, Country or Office: GERMANY, Application No. 30 2021 024 825 in association with the same kind of goods and in association with the same kind of services
