## Index headings

KPI SOLUTIONS

### Goods (Nice class & Statement)

- 9 (1) Downloadable computer software to monitor and control factory manufacturing processes; Downloadable factory automation software, namely, software to integrate manufacturing machine operations, track problems, and generate production reports; Downloadable computer software for controlling smart warehouse and distribution facility automation processes including order fulfillment, inventory management, material handling, software implementation, and systems integration technologies and logistics; Downloadable software for interfacing with and controlling robots for warehouse automation; industrial automation controls; Electromechanical controls for use in systems integration; Programmable logic controllers; Photoelectric sensors; Encoders; Electric sensors; Sensors for determining velocity; Temperature sensors; Motor starters; Variable frequency drives for motors, other than for land vehicles; Alarms; Beacons; Electromagnetic solenoids

### Services (Nice class & Statement)

- 35 (1) Analyzing and compiling business data for determining efficiency of order fulfillment, material handling, and systems integration technologies and logistics; Business research and data analysis services in the field of order fulfillment, material handling and systems integration technologies; Consultation in the field of smart warehouse and distribution facility automation processes including order fulfillment, inventory management, material handling, software implementation, and systems integration technologies and logistics; Analyzing and compiling business data for determining efficiency of order fulfillment, inventory management, material handling, software implementation, and systems integration technologies and logistics; Business research and data analysis services in the field of order fulfillment, material handling and smart warehouse systems integration technologies
- 37 (2) Planning and laying out of production facilities; Providing information related to the installation, maintenance and repair of warehouse and distribution facility equipment and material handling equipment; Technical support services, namely, technical advice related to the installation of manufacturing equipment; Installation, maintenance and repair of computer hardware and system controls
- 42 (3) Planning and design of manufacturing, warehouse, and distribution facilities; Technological planning and consulting services in the field of warehouse and

distribution facility design; Technical support services, namely, troubleshooting of industrial process control computer software problems; Research and development and consultation related thereto in the field of smart warehouse and distribution facility automation processes including order fulfillment, inventory management, material handling, software implementation, and systems integration technologies and logistics; Engineering services in the field of mechanical, electrical and control integration for various technologies; Custom design and engineering of material handling equipment; Providing temporary use of online non-downloadable software for monitoring and controlling smart warehouse and distribution facility automation processes including order fulfillment, inventory management, material handling, software implementation, and systems integration technologies and logistics; Technology consultation in the field of smart warehouse design, distribution facilities design, order fulfillment, material handling, and smart warehouse systems integration technologies; Scientific and technological services, namely simulation and analysis in the field of smart warehouse and distribution facility automation processes including order fulfillment, inventory management, material handling, software implementation, and systems integration technologies and logistics; Providing temporary use of non-downloadable cloud-based software for processing warehouse orders, providing business logic to process orders, warehouse management, and providing insight into warehouse execution and logistics; Computer software development, computer programming, and maintenance of computer software for processing warehouse orders, providing business logic to process orders, warehouse management, providing insight into warehouse execution and logistics, and management of inventory and finished goods

**Claims**

Priority Filing Date: December 09, 2022, Country or Office: UNITED STATES OF AMERICA, Application No. 97710822 in association with the same kind of goods and in association with the same kind of services
