Index headings

GNJ AUTOMATION

Goods (Nice class & Statement)

- 7 (1) Automatic conveyor belts, machines and installations; belt conveyors; belts for conveyors; cargo handling robots for use in warehouses; conveyors; conveyors being machines; end-effecters for warehouse robot arms; order-picking machines for warehouses
- 7 (2) Cargo handling machines, namely conveyors for use in warehouses; industrial robots for the warehouse industry namely for storing, picking and retrieving cargo; parts for conveyors; services robots being cargo handling machines in the field of warehouses; sorting machines for industrial use, namely cargo sorting machines for use in warehouses; stacking machines for use in warehouses; warehouse machinery and equipment used to identify, categorize, process and direct warehoused items to the correct location in the warehouse; warehouse machinery and equipment used to automatically store items for warehouse storage and retrieve items from warehouse storage; warehouse carousel storage machinery and equipment; parts and fittings for all of the aforesaid goods
- 9 (3) Downloadable software for the automation of electrical control systems for machines for warehouses; downloadable mobile application software for the automation of electrical control systems for machines for warehouses; electrical industrial controls for conveyor systems in warehouses; warehouse automation software, namely software to integrate warehousing machine operations; industrial automation software for storing, picking and retrieving warehoused cargo; software for robotic process automation of warehousing machinery and systems; software and electrical control systems for warehouse machinery and equipment used to identify, categorize, process and direct warehoused items to the correct location in the warehouse and warehouse machinery and equipment used to automatically store items for warehouse storage and retrieve items from warehouse storage; software and electrical systems for automated order-picking machines for warehouses; telematic apparatus for use in automation of warehouse machinery and equipment
- 12 (4) Automatic guided vehicles for use in warehouses
- 12 (5) Transport robot vehicles for use in warehouses

Services (Nice class & Statement)

- 35 (1) Business consultancy services in the field of management and operation of warehouse facilities and warehouse logistics; sales, distribution and marketing services in the field of automated warehouse storage solutions and material handling systems, warehouse

- automation, warehousing machinery and equipment and industrial automation of warehousing machinery and equipment
- 37 (2) Business consulting and advisory services relating to the installation of warehousing automation equipment; business consulting services in the field of installation, maintenance and repair of warehousing automation equipment, namely machinery, robots and control systems; installation, repair and maintenance of automated warehouse distribution machines, equipment and systems
- 39 (3) Providing information related to automated warehousing
- 42 (4) Business consulting and advisory services relating to the design and configuration of warehousing automation equipment and systems; application service provider featuring application programming interface software for warehouse monitoring, control and automation; development and programming of control systems for warehouse automation; consulting services in the field of warehouse automation; custom design and development of automated machinery for use in warehouses; customized development of computer software for use in automated warehousing; design and development of warehousing automation equipment and systems; design and development of automated machinery used in the industrial sector; design development and programming of software used in automated warehousing; providing temporary use of online non-downloadable software for the automation of electrical control systems for machines for warehouses, the automation of electrical control systems for machines for warehouses, for the integration of warehousing machine operations, for industrial automation of storing, picking and retrieving warehoused cargo, and for robotic process automation of warehousing machinery and systems; software as a service (SaaS) for use in warehouse automation; technological planning and consulting services in the field of design and configuration of automated warehouses; technical support in the installation and use of warehouse automation systems and computer hardware and software therefor
