Vienna information (Code & Description)

27.5.1	Letters presenting a special form of writing
A 27.5.19	Letters overlapping
A 27.5.22	Monograms formed of intertwined, overlapping or otherwise combined letters

Goods (Nice class & Statement)

9	(1) Computer software for managing, testing, and using multiple computer operating systems, and instructional manuals therefor sold as a unit; computer software for automation of information technology (IT) network management processes; computer software for the management and deployment of computing resources being computer hardware, computer software, and cloud infrastructure across computer networks in the field of cloud computing networks and applications and software-defined data center (SDDC) infrastructure; downloadable software for creating and managing a cloud-based software-defined data center of compute, electronic data storage and computer network capabilities in the field of cloud computing networks and applications and software-defined data center (SDDC) infrastructure; operating system software used across servers, storage and networks to aggregate hardware resources and provide built-in services to applications for operating, developing, and managing software and hardware resources; operating system software for managing and automating information technology network management processes.
---	--

Services (Nice class & Statement)

42	(1) Building, executing, securing and managing computer applications and software application components in the nature of computer software development and design and development of computer hardware; deploying, managing, securing and operating containerized applications across different virtual environments, namely, design and development of containerized computer software applications and computer hardware; Platform as a service (PaaS) featuring computer software platforms for deploying, managing, securing and operating containerized applications across different virtual environments, namely, design and development of containerized computer software applications and computer hardware; Platform as a service (PaaS) featuring computer software platforms for deploying, managing, securing and operating containerized applications across different virtual environments;
----	--

technical consulting and research services in the fields of computer software, and computer networks; consulting services in the field of design, selection, implementation and use of computer hardware and software systems; computer programming services; design, development, deployment, implementation, analysis, integration, and management of computer software for others; installation, modification, maintenance, and repair of computer software; customization and configuration of computer software; consulting services in the field of computer technology and software development relating to virtual infrastructure, electronic data storage and computer network configuration; managed information technology services and operations for others, namely, computer technology consulting services in the field of management of virtual infrastructure, computer networks and electronic data storage services; service provider, namely, hosting, managing and administering computer software on a global computer network for others; leasing and rental of computer software; technical support services, namely, trouble shooting of computer software; technical support services, namely, trouble shooting in the nature of computer hardware diagnosis; technical support services, namely, trouble shooting in the nature of diagnosing computer hardware problems; platform as a Service (PaaS) featuring computer software platforms for creating and managing a cloud-based software-defined data center of compute, electronic data storage and computer network capabilities in the field of cloud computing networks and applications and software-defined data center (SDDC) infrastructure; software as a Service (SaaS) featuring computer software for monitoring endpoints of a data center for known-good behavior and provides inputs upon detecting divergence from the known-good behavior; software as a service (SAAS) services featuring software to provide platform mobility for software applications to enable software applications to run seamlessly across diverse operating systems; software as a service featuring software for the management of electronic data storage and computer network resources; software as a service featuring software for the automation of information technology (IT) network management processes; software as a service featuring software for the management and deployment of computing resources across computer networks in the field of cloud computing networks and applications and software-defined data center (SDDC) infrastructure; enterprise computing services, namely, providing temporary use of non- downloadable software for use in computer program license management and for use in account and permissions administration; providing temporary use of non-downloadable software for data manipulation, validation and reporting of customer specific information and customer identity in the field of cloud computing networks and applications and software-defined data center (SDDC) infrastructure; computer services, namely, designing, programming, managing, and developing virtual desktop infrastructure platforms; designing, programming, managing, and developing software applications for use on virtual desktop

infrastructure platforms; computer services, namely, creation and management of computer services for operating system software used across servers, storage and networks to aggregate software and hardware resources in the field of cloud computing networks and applications and software-defined data center (SDDC) infrastructure; computer services, namely, designing, developing, implementing of computer software and hardware systems for others; computer services, namely, maintenance of computer software applications, computer software infrastructure, computer software, computer software development platforms, computer networks and computer databases; creation, management and delivery of computer applications and IT services, namely, computer software development via the Internet; computer time sharing services; leasing computer facilities; computer services in the nature of web, intranet, phone, mobile network-based access to and manipulation of user defined information, personal profiles, and information in the nature of an application service provider, namely, providing, hosting, managing, developing, and maintaining computer software applications, software, web sites, and databases of others in the fields of business productivity, wireless communication, mobile information access in the field of remote data management for wireless delivery of content to handheld computers, laptops, desktops, servers and mobile electronic devices; computer services, namely, the management of computing resources, namely, enforcing, restricting, controlling, and optimizing load balancing, resource scheduling, resource monitoring, resource allocation, and priority management, and optimizing access privileges of users of computing resources for network resources based on assigned credentials and information technology (IT) services by means of global computer information networks, intranet, phone, and mobile networks, namely, design, creation and maintenance of web sites for others; providing temporary use of on-line non- downloadable software for management of computing resources and the delivery of computer applications and information technology (IT) network management services in the field of cloud computing networks and applications and software defined data center (SDDC) infrastructure.
