FX-LINK
EFFECTS

**Goods (Nice class & Statement)**

9 (1) Audio/video cables; cables for optical signal transmission; cable connectors; audio/video cable connectors; signal connecting equipment, namely interconnect equipment for connecting signal routing equipment, signal processing equipment and communication equipment; signal transport equipment, namely audio signal transport equipment, video signal transport equipment and data signal transport equipment; broadcasting equipment, namely, frames for mounting electronic equipment, amplifiers, encoders, decoders, video signal monitors, audio signal monitors, signal generators, video signal converters, audio signal converters, data signal translators, electronic transmitters for use in broadcasting, audio and video receivers, audio and video transceivers, radio frequency wavelength converters, video signal combiners and multiplexers, audio signal combiners, video converters, audio converters; data format and signal converters, data signal routers; signal routing equipment, namely, electronic control panels, graphical control panel interfaces, electronic remote controls and graphical control panel interfaces for audio and video routers, video processors for multi-display and signal monitoring, and multi-image video display interfaces; signal switching equipment, namely, electronic audio signal switches and electronic video signal switchers; audio and video signal processors; signal processing equipment namely, digital video signal processing equipment and digital audio signal processing equipment; audio and video signal distribution equipment, namely, audio and video signal transport equipment in the nature of audio and video signal transmitters, audio and video signal receivers, audio and video signal format converters, audio and video signal repeaters and audio and video signal routing equipment in the nature of digital audio and video signal switches, radio frequency audio and video signal switches, digital audio and video signal routers and radio frequency audio and video signal switches; video distribution equipment, namely, video signal transport equipment in the nature of video signal transmitters, video signal receivers, video signal format converters, video signal repeaters and video signal routing equipment in the nature of digital video signal switches, radio frequency video signal switches, digital video signal routers and radio frequency video signal switches; video reproduction equipment, namely, video playback equipment; router control panels including in the nature of digital graphical control panels; master control switches for use in the field of broadcasting namely electronic signal

switches and digital signal switches; desktop control panels including in the nature of graphical control panels; network gateways in the nature of gateway routers; downloadable computer software for video processing; downloadable computer firmware for video processing; downloadable computer software for audio processing; downloadable computer firmware for audio processing; downloadable computer software for data signal processing; downloadable computer firmware for data signal processing
