HIGH RESOLUTION DECISION ENGINE

Goods (Nice class & Statement)

9	(1) Computer software, sensors, robotics, scanners, imagery, and other technologies for use in imaging, measurement, remote sensing core scanning, core sampling, planning, design, development, analysis, modelling and project management in the field of geology, mining, oil and gas projects, construction and engineering projects; Computer software for digitization, visualization, analysis, manipulation, processing and quantification of geological data for petroleum, natural gas and mineral deposits, and geotechnical projects; Computer software, namely software for planning, design, development, analysis, modelling and project management in the field of geology, mining, oil and gas projects, construction and engineering projects; Computer software packages, namely software for planning, design, development, analysis, modelling and project management in the field of geology, mining, oil and gas projects, construction and engineering projects; Downloadable software applications (apps) for planning, design, development, analysis, modelling and management of projects in the field of geology, mining, oil and gas projects, construction and engineering projects; Computer software for applying machine learning, machine vision, and other algorithms to geological data for petroleum, natural gas and mineral deposits, and geotechnical projects

Services (Nice class & Statement)

35	(1) Advisory and consulting services, namely, providing advice and consulting services for geological interpretation, planning, design and management of projects in the field of geology, mines, mining, oil and gas and construction and engineering
42	(2) Computer software advisory and consulting services; design and development of computer software; repair and upgrading of computer software; installation and maintenance of computer software; electronic data storage services, namely cloud storage services, storage-as-a service and online storage services for others; provision of online non-downloadable software for planning, design, development, analysis, modelling and project management in the field of geology, mining, oil and gas projects, construction and engineering projects via a client portal on a website; technical data analysis namely, analysis of data in the field of geology, mining, oil and gas projects, construction and engineering projects for others and for software and computer modelling for others; computer software advisory services and consulting services for planning, design, development, analysis,

modelling and project management in the field of geology, mining, oil and gas projects, construction and engineering projects; computer modelling services, namely, geological modelling and resource modelling; Software as a service featuring computer software for applying machine learning, machine vision, and other algorithms to geological data for petroleum, natural gas and mineral deposits, and geotechnical projects; Petroleum, natural gas and mineral deposit exploration data gathering and processing
