Goods (Nice class & Statement)

- 9 (1) Satellites; satellite transmitters and receivers; satellite communication apparatus and instruments, namely, satellite receivers, satellite receiver modules, transmitters, antennas, multiplexers, decoding boxes, integrated circuits, satellite terminals, and satellite earth stations; telecommunication hardware, namely, satellite-based and earth-based antenna systems for enabling wireless connection to global communications networks and electronic devices; internet servers; computer network servers; computer hardware for aerospace, satellite communications, telecommunications, orbital computing, and data center applications; global positioning and geo-location apparatus and instruments, namely, satellite-based receivers and navigation devices; equipment for receiving, processing, transmitting, storing, and analyzing voice, video, image, audio, and data signals via satellites, wireless telecommunications networks, and computers; computer central processing units; central processing units for processing information, data, sound or images; none of the foregoing in connection with goods or services that identify internal experts in an enterprise and use only the identified internal expert information as a basis to allow internal personnel route communications and exchange information.
- 9 (2) Apparatus for recording, transmission, processing and reproduction of sound, images, video or data in the fields of deep learning, machine learning, artificial intelligence, neural networks, and machine vision; downloadable computer programs and downloadable computer software for the artificial production of human speech and text, deep learning, machine learning, artificial intelligence, neural networks, and machine vision; Computer software for computers, portable handheld digital electronic communication devices, mobile devices, and wired and wireless communication devices for facilitation of communication in the field of social networking; Computer software for use as an application programming interface (API); application programming interface (API) for use in building software applications; application programming interface (API) software for enabling the sharing of computer programming code with other computer software; application programming interface (API) for third-party software; downloadable mobile applications for finding, locating, and interacting with other users and places; software for geo-location based advertising and product and service promotions; Downloadable Computer software development tools; application programming interface (API) software for enabling the sharing of

computer programming code with other computer software; software and downloadable mobile applications for business consulting, namely, providing business strategy, insight, and marketing guidance to others; software and downloadable mobile applications for connecting social network users with businesses; downloadable computer software for optimization and management of online and mobile marketing of third parties; content monetization platform, namely, computer software to create, manage, distribute, present and display advertisements and advertising campaigns of others via the internet; software and downloadable mobile applications for processing electronic payments; computer software for information integration, analysis, and management; character recognition software; voice recognition software; Computer games namely computer game software downloadable from a global computer network, recorded computer game programs, downloadable computer game programs; Downloadable interactive multimedia computer games programs; none of the foregoing in connection with goods or services that identify internal experts in an enterprise and use only the identified internal expert information as a basis to allow internal personnel route communications and exchange information.

Services (Nice class & Statement)

- | | |
|----|--|
| 35 | (1) Business consulting; business consulting services in the field of information technology (IT) and cloud computing; business risk management consultation; business records management; trade show management services; conducting and arranging trade show exhibitions in the fields of technology, cloud computing, web services, software, software as a service (SaaS), artificial intelligence, software development, game development, information security, networking, mobile computing, and the Internet of Things (IoT); computerized on-line ordering featuring developer tools and cloud computing software and services; providing an on-line marketplace for buyers and sellers of goods and services; domain name directory services; message and conference call transcription services; none of the foregoing in connection with goods or services that identify internal experts in an enterprise and use only the identified internal expert information as a basis to allow internal personnel route communications and exchange information. |
| 38 | (2) Streaming of software applications; streaming of audio and video material on the Internet; video-on-demand transmission; providing multiple user access to global computer information networks for the transfer and dissemination of a wide range of information; providing access to remotely hosted operating systems and computer applications through the internet; providing access to cloud based computing resources and storage; providing virtual private network (VPN) services; Telecommunication services, namely, transmission and streaming of voice, data, images, audio, video, real-time news, entertainment content, or information by means of |

telecommunications networks, wireless communication networks, and the internet; providing online forums for the transmission of information, audio, video, real-time news, entertainment content, or information among users of computing and mobile devices in an online community; telecommunication services, namely, providing online and telecommunication facilities for real-time interaction between and among users of computers, mobile and handheld computers, and wired and wireless communication devices; electronic transmission of downloadable audio and video files via a computer and communications networks. Providing online and telecommunication facilities, namely, wireless networks for real-time interaction between and among users of computers, laptops, mobile phones, smart phones, tablet computers, wearable technology and personal digital assistants; providing access to global communications networks featuring websites and the internet; webcasting services; video on demand transmissions; audio on demand transmissions; Broadcasting services via a global computer network, the Internet and other communications networks; Facilitating access to third party websites and third party electronic content via a universal login; providing access to online journals, namely, blogs featuring user-defined content; providing an online community forum for users to share and stream information, audio, video, real-time news, entertainment content, or information, to form virtual communities, and to engage in social networking; Providing a website on the internet for social networking; providing access to a video sharing portal; providing access to digital music websites on the Internet; none of the foregoing in connection with goods or services that identify internal experts in an enterprise and use only the identified internal expert information as a basis to allow internal personnel route communications and exchange information.

41

(3) Education services, namely, conducting seminars, classes, workshops and conferences in the fields of technology, cloud computing, web services, software, software as a service (SaaS), artificial intelligence, software development, game development, and information security, networking, mobile computing, and the Internet of Things (IoT); online journals, namely, blogs featuring information in the fields of technology, cloud computing, web services, software, software as a service (SaaS), artificial intelligence, software development, game development, and information security, networking, mobile computing, and the Internet of Things (IoT); arranging, hosting, and conducting educational conferences and business conferences; Organizing and conducting exhibitions, events, workshops, seminars, and panel discussions; Providing online journals, namely, blogs and video blogs featuring user-defined content in the field of social networking; providing online journals, namely, blogs and video blogs featuring personal information and opinions in the field of general interest; providing a website featuring user-generated blogs; providing online journals, namely, video blogs featuring text, video and audio; Providing a real-time information network featuring the

latest stories, ideas, opinions, news, commentary and information of personal interest via the internet and other communications networks; Publication of information, news, articles, newsletters, blogs, video blogs, and commentary in the fields of general interest, entertainment, popular culture, celebrities, sports, fashion, education, recreation, training, blogging, current events, radio, movies, television, music, books, art, theatre, dance, live artistic performances, concerts, comedy, awards shows, fashion shows, festivals, games, contests, tournaments, museums, exhibitions, science, technology, software development, business, finance, jobs, social, professional and business networking, advertising and marketing, via the Internet and other communications networks; publication of information relating to advertising, marketing, software development, and web and mobile application analytics; entertainment services for sharing downloadable and non-downloadable videos, audio recordings and images; providing online videos; Providing online non-downloadable white papers, articles, presentations, books, journals, leaflets, manuals and magazines in the fields of general interest, entertainment, popular culture, sports, fashion, recreation, current events, radio, movies, television, music, books, arts, theatre, dance, live artistic performances, concerts, comedy, awards shows, fashion shows, festivals, games, contests, tournaments, museums, exhibitions, science, technology, software development, business, finance, jobs, education, social, professional and business networking, advertising and marketing; Publishing of electronic publications; online publication of electronic books, journals, newsletters, magazines, and periodicals; Providing online computer games and video games; Event planning; Organizing competitions in the fields of software development and mobile applications for entertainment and educational purposes; organizing online competitions in the fields of software development and mobile applications for entertainment and educational purposes; publication of information in the field of arranging, organizing and conducting contests and games; providing online journals, namely, blogs and video blogs featuring personal information, opinions, text, video and audio in the field of general interest; providing a website featuring user-generated blogs; News reporting services; providing online entertainment and real-time news information; none of the foregoing in connection with goods or services that identify internal experts in an enterprise and use only the identified internal expert information as a basis to allow internal personnel route communications and exchange information.

42

(4) Information technology (IT) services; cloud computing services; computer services, namely, cloud hosting provider services; hosting of digital content on the Internet; cloud hosting of virtual computing environments; server hosting; computer time-sharing services; providing virtual computer systems and virtual computer environments through cloud computing; computer services, namely, providing virtual application, web, file, and storage servers of variable capacity to others; scaling services, namely,

providing variable computing and electronic storage capacity to others; administering and maintaining virtual computing environments for others; Application service provider (ASP), namely, hosting computer software applications of others; computer services, namely, hosting, managing, provisioning, scaling, administering, maintaining, monitoring, securing, encrypting, decrypting, replicating and backing up cloud computing environments for others; computer software rental; consulting and providing information in the fields of information technology, cloud computing, web services, software, software as a service (SaaS), artificial intelligence, software development, game development, networking, mobile computing, and the Internet of Things (IoT); planning, design and implementation of computer technologies for others; software configuration management services; technical support services, namely, troubleshooting of computer software problems; computer services, namely, monitoring the web sites of others to improve their scalability and performance; computer services, namely, enforcing, restricting and controlling access privileges of users of computing and network resources based on assigned credentials; creating indexes of computer network-based information, sites, and other resources available on global computer networks for others; DNS services for others; computer services, namely, intrusion detection and protection; computer services, namely, web traffic filtering; computer services, namely, providing desktop and application streaming; cross-platform conversion of digital content into other forms of digital content; hosting an online community website featuring shared communications between community members interested in technology, cloud computing, web services, software, software as a service (SaaS), artificial intelligence, software development, game development, networking, mobile computing, and the Internet of Things (IoT); software as a service (SaaS) featuring software for cloud computing; software as a service (SaaS) featuring software for virtualization; software as a service (SaaS) featuring software for managing and deploying virtual machines to a cloud computing platform; software as a service (SaaS) featuring software for use in cloud infrastructure management and automation; software as a service (SaaS) featuring software for running cloud computing based applications; software as a service (SaaS) featuring software platforms for cloud computing networks and applications; software as a service (SaaS) featuring software that provides access to cloud-based scalable computing resources; software as a service (SaaS) featuring software for monitoring cloud and application performance; software as a service (SaaS) featuring software for collecting, editing, modifying, organizing, synchronizing, integrating, monitoring, transmitting, storage and sharing of information; software as a service (SaaS) featuring software for desktop and application streaming; software as a service (SaaS) featuring software for computer network management and automation; software as a service (SaaS) featuring user authentication

software; software as a service (SaaS) featuring cryptography software; software as a service (SaaS) featuring software for monitoring, tracking, logging, analyzing, auditing and reporting in the field of regulatory and information security compliance; software as a service (SaaS) featuring software for monitoring, tracking, logging and analyzing computer network events, user activity, changes to resource activity and security statistics; software as a service (SaaS) featuring network security software; software as a service (SaaS) featuring network threat detection software; software as a service (SaaS) featuring network access management and monitoring software; software as a service (SaaS) featuring e-commerce software to allow users to perform electronic business transactions via a global computer network; software as a service (SaaS) featuring software for operating and managing call centers and contact centers; software as a service (SaaS) featuring software platforms for providing customer service and customer support; software as a service (SaaS) featuring software for speech, facial and optical character recognition; software as a service (SaaS) featuring software for converting text to speech; software as a service (SaaS) featuring software for image analysis, identification, processing, conversion, cropping, resizing and enhancement; software as a service (SaaS) featuring software for video streaming and for high-speed formatting and processing of audio and video streams; software as a service (SaaS) featuring software for deploying live and on-demand video content; software as a service (SaaS) featuring software used to process, convert, transcode, encode, decode, encrypt, decrypt, distribute and manipulate digital video, image and audio files; software as a service (SaaS) featuring software for inserting and removing advertising and other content into video streams; software as a service (SaaS) featuring software for digital rights management; software as a service (SaaS) featuring software for time-shifted television viewing; software as a service (SaaS) featuring game software; software as a service (SaaS) featuring game engine software; software as a service (SaaS) featuring software to manage, connect, and operate internet of things (IOT) electronic devices; software as a service (SaaS) featuring software for enabling electronic devices to operate and communicate locally while retaining the benefits of analytics and high-level services in the cloud; software as a service (SaaS) featuring software development tools; software as a service (SaaS) featuring software for application development, testing, deployment and management; software as a service (SaaS) featuring software for managing software development projects and teams; providing authentication services via online non-downloadable software for establishing and transmitting security credentials for domain name services; none of the foregoing in connection with goods or services that identify internal experts in an enterprise and use only the identified internal expert information as a basis to allow internal personnel route communications and exchange information.
