Services (Nice class & Statement)

- | | |
|----|--|
| 35 | (1) Resale of physical computer network components, network switches, servers, routers, firewalls, and work stations; |
| 37 | (2) Installation, maintenance, and repair of voice, data, fiber optics, video, wireless, and other low voltage cabling systems; consulting in the field of installation, maintenance, and repair of voice, data, fiber optics, video, wireless, and other low voltage cabling systems; structured cabling services; consulting in the field of structured cabling; installation, maintenance, and repair of Wi-Fi networks and systems; consulting in the field of installation, maintenance, and repair of Wi-Fi networks and systems; building construction; consulting in the field of building construction; installation, maintenance, and repair of electrical and communication equipment and infrastructure; consulting in the field of installation, maintenance, and repair of electrical and communication equipment and infrastructure; installation, maintenance, and repair of electrical communication equipment and infrastructure; consulting in the field of installation, maintenance, and repair of electrical communication equipment and infrastructure; installation, maintenance, and repair of electrical wiring; consulting in the field of installation, maintenance, and repair of electrical wiring; installation, maintenance, and repair of electrical systems; consulting in the field of installation, maintenance, and repair of electrical systems; installation, maintenance, and repair of cables; installation, maintenance, and repair of cables under manufacturer's warranty; consulting in the field of installation, maintenance, and repair of low voltage and communication cables; installation, maintenance, and repair of audio and video equipment and systems; consulting in the field of installation, maintenance, and repair of audio and video equipment and systems; installation maintenance, and repair of power-over-ethernet lighting; consulting in the field of installation, maintenance, and repair of power-over-ethernet lighting; installation, maintenance, and repair of paging equipment and systems; consulting in the field of installation, maintenance, and repair of paging equipment and systems; installation, maintenance, and repair of security, surveillance camera, and closed-circuit television equipment and systems; consulting in the field of installation, maintenance, and repair of security, surveillance camera, and closed-circuit television equipment and systems; installation, maintenance, and repair of outside plant, underground, and aerial utilities; consulting in the field of installation, maintenance, and |

repair of outside plant, underground, and aerial utilities; consulting in the field of installation, maintenance, and repair of sound masking equipment and systems; maintenance and restoration services of electrical and low voltage cabling systems; installation, maintenance, and repair of information and communication technology (ICT) cabling systems and equipment; consulting in the field of installation, maintenance, and repair of information and communication technology (ICT) cabling systems and equipment; installation of telephone systems; installation of physical computer network components, network switches, servers, routers, firewalls, and work stations; installation of firewalls and computer software; installation of sound masking systems; installation, repair, and maintenance of infrastructure in the field of computer software and computer hardware; consulting in the field of installation, repair, and maintenance of infrastructure in the field of computer software and computer hardware; installation, repair, and maintenance of audio equipment and audio systems; consulting in the field of installation, repair, and maintenance of audio equipment and audio systems; installation, maintenance, and repair of access control systems; consulting in the field of installation, maintenance, and repair of access control systems; installation, maintenance, and repair of audio and video surveillance systems; consulting in the field of installation, maintenance, and repair of audio and video surveillance systems; installation, maintenance, and repair of intrusion detection systems; consulting in the field of installation, maintenance, and repair of intrusion detection systems; installation, maintenance, and repair of alarm systems; consulting in the field of installation, maintenance, and repair of alarm systems; installation, maintenance, repair, and inspection of door access safety control systems; consulting in the field of installation, maintenance, and repair, of door access safety control systems; installation, maintenance, and repair of fire, smoke, and heat alarms; consulting in the field of installation, maintenance, and repair of fire, smoke, and heat alarms; installation, maintenance, and repair of burglar alarms; installation, maintenance, and repair of intruder alarms; consulting and project management in the field of telecommunications; consulting and project management in the field of the installation, maintenance, and repair of telecommunication systems; consulting and project management in the field of voice, data, fiber optics, video, wireless and low voltage cabling systems; consulting and project management in the field of structured cabling; consulting and project management in the field of installation, maintenance, and repair of Wi-Fi networks and systems; consulting and project management in the field of electrical and communication equipment and infrastructure; consulting and project management in the field of audio video equipment and systems; consulting and project management in the field of power over ethernet lighting; consulting and project management in the field of paging equipment and systems; consulting and project management in the field of security and surveillance camera equipment and systems; consulting and project

management in the field of outside plant, underground, and aerial utilities; consulting and project management in the field of sound masking equipment and systems; consulting and project management in the field of communication technology cabling systems and equipment; consulting and project management in the field of voice, data, audio, and video technologies; consulting and project management in the field of wireless networks; integration, installation, maintenance, and repair of telecommunications distributions; consulting in the field of integration, installation, maintenance, and repair of telecommunications distributions; consulting in the field of wireless networks for commercial, industrial, and residential purposes; installation of wireless networks for commercial, industrial, and residential purposes; installation, maintenance, and repair of data centers; consulting in the field of installation, maintenance, and repair of data centers; outside plant cabling; copper and fiber optic outdoor cabling; installation, maintenance, and repair of local area networks; consulting in the field of installation, maintenance, and repair of local area networks;

42

(3) Design of voice, data, fiber optics, video, wireless, and other low voltage cabling systems; consulting in the field of design of voice, data, fiber optics, video, wireless, and other low voltage cabling systems; consulting in the field of structured cabling; design of Wi-Fi networks and systems; consulting in the field of design of Wi-Fi networks and systems; design of electrical and communication equipment and infrastructure; consulting in the field of design of electrical and communication equipment and infrastructure; design of electrical communication equipment and infrastructure; consulting in the field of design of electrical communication equipment and infrastructure; design of electrical wiring; consulting in the field of design of electrical wiring; design of electrical systems; consulting in the field of design of electrical systems; design of cables; design of cables under manufacturer's warranty; consulting in the field of design of low voltage and communication cables; design of audio and video equipment and systems; consulting in the field of design of audio and video equipment and systems; design of power-over-ethernet lighting; consulting in the field of design of power-over-ethernet lighting; design of paging equipment and systems; consulting in the field of design of paging equipment and systems; design of security, surveillance camera, and closed-circuit television equipment and systems; consulting in the field of design of security, surveillance camera, and closed-circuit television equipment and systems; design of outside plant, underground, and aerial utilities; consulting in the field of design of outside plant, underground, and aerial utilities; consulting in the field of design of sound masking equipment and systems; testing and certification of low voltage cabling systems; auditing, documentation, and inspection of telecommunication and electrical systems and infrastructure; consulting in the field of telecommunication and electrical systems and infrastructure; design of information and communication

technology (ICT) cabling systems and equipment; consulting in the field of design of information and communication technology (ICT) cabling systems and equipment; consulting in field of computer data security; design of infrastructure in the field of computer software and computer hardware; consulting in the field of design of infrastructure in the field of computer software and computer hardware; design of audio equipment and audio systems; consulting in the field of design of audio equipment and audio systems; design of access control systems; consulting in the field of design of access control systems; design of audio and video surveillance systems; consulting in the field of design of audio and video surveillance systems; design of intrusion detection systems; consulting in the field of design of intrusion detection systems; design of alarm systems; consulting in the field of design of alarm systems; installation and programming of facilities management hardware and software to control building environment, access, and security systems; consulting in the field of installation and programming of facilities management hardware and software to control building environment, access, and security systems; installation and programming of home hardware and software to control home access and security systems; consulting in the field of installation and programming of home hardware and software to control home access and security systems; design of door access safety control systems; consulting in the field of design of door access safety control systems; consulting and project management in the field of telecommunications; consulting and project management in the field of voice, data, fiber optics, video, wireless and low voltage cabling systems; consulting and project management in the field of design and repair of Wi-Fi networks and systems; consulting and project management in the field of electrical and communication equipment and infrastructure; consulting and project management in the field of audio video equipment and systems; consulting and project management in the field of power over ethernet lighting; consulting and project management in the field of paging equipment and systems; consulting and project management in the field of security and surveillance camera equipment and systems; consulting and project management in the field of outside plant, underground, and aerial utilities; consulting and project management in the field of sound masking equipment and systems; consulting and project management in the field of communication technology cabling systems and equipment; consulting and project management in the field of voice, data, audio, and video technologies; consulting and project management in the field of electronic safety and security systems; consulting and project management in the field of wireless networks; design of telecommunications distributions; consulting in the field of design of telecommunications distributions; consulting in the field of wireless networks for commercial, industrial, and residential purposes; design of wireless networks for commercial, industrial, and residential purposes; wi-fi surveys and reports of wireless networks for commercial,

45

industrial, and residential purposes; design of data centers; consulting in the field of design of data centers; design of local area networks; consulting in the field of design of local area networks;
(4) Consultancy services in the field of residential, business, and industrial security;
