DAX SONICS

Goods (Nice class & Statement)

- 9 (1) Computer software for ultrasound imaging, ultrasound signal processing, image processing, medical image analysis, image-guided intervention, computer vision and artificial intelligence applications in the field of ultrasound; Electronic apparatus for generating, transmitting, receiving and processing ultrasound signals; Beamforming apparatus and electronic control systems for ultrasound imaging systems; Downloadable software for the acquisition, processing, analysis, visualization and management of ultrasound data and images.
- 10 (2) Medical ultrasound apparatus; Diagnostic ultrasound apparatus for medical use; Ultrasound transducers for medical use; Medical imaging apparatus using ultrasound technology; Focused ultrasound apparatus for therapeutic and medical use; Parts and fittings for ultrasound apparatus.

Services (Nice class & Statement)

- 41 (1) Manufacturing services for others in the field of ultrasound imaging, ultrasonic devices, medical imaging systems, focused ultrasound systems and image-guided intervention systems.
- 42 (2) Engineering services in the field of ultrasound technology; Engineering consulting services in the field of ultrasound technology; Research and development services in the field of ultrasound imaging, ultrasonic devices, medical imaging systems, focused ultrasound systems and image-guided intervention systems; Design and development of ultrasound transducers, ultrasonic sensors, beamformers, electronic hardware, firmware and software; Custom design and development of medical devices and medical imaging equipment; Design and development of computer software; Technical consulting services relating to ultrasound transducers, ultrasound imaging systems, ultrasonic technologies and medical imaging equipment; Electronic engineering services, namely design and development of printed circuit boards, embedded systems and electronic control systems for ultrasonic applications; Product development, testing, prototyping and validation services in the field of ultrasound and medical imaging technologies; Software as a service (SaaS) featuring software for processing, analysis and visualization of ultrasound images and ultrasound data.
