

To the Broadcasting and Telecommunications Legislative Review Panel,

I am writing today to comment on the Broadcasting and Telecommunications legislative review.

Canada has been behind the rest of the world on high speed internet access and now there is talk of allowing ISP's to limit access? Hell, I've JUST recently got access faster than 1.3Mps!!! Please, lets mandate that the same ISP's that are trying to control their monopolies first due their duty to the nation by building out high speed. I just found out (from the cable locator man) that there's a fibreoptic line running right along the road in front of my house and that it's been there for years but BELL wouldn't hook me up to it. My God, I remember when Bell Canada was a proud BUILDER of Canada but now they're holding us back. Say NO to the ISP's and YES to Canada's future.

Sincerely,

Michael Hawke
