**Subject: Application for the Provision of Cellular Services by New Parties in Accordance with Industry Canada RP-019**

Dear Mr. Trudel,

This letter of intent is submitted pursuant to Industry Canada's Policy for the Provision of Cellular Services by New Parties as set out in Radio Systems Policy RP-019.

Lynx Mobility Inc. proposes to provide coverage in Natashquan, Quebec.

Currently, there is no cellular service being provided by any of the 850 MHz cellular spectrum licensees, namely Rogers Wireless Inc, Bell Canada and Bell Aliant.

Lynx Mobility corresponded with Rogers between March 2 and March 26, 2009, regarding the possibility of working together to provide service in Natashquan. By letter dated March 26, 2009 (attached), Rogers informed Lynx Mobility that it was not prepared to enter into an arrangement with Lynx Mobility.

Lynx Mobility seeks approval to employ approximately half of the A-Band, specifically: 825.030 MHz – 830.030 MHz paired with 870.030 MHz – 875.030 MHz, or 835.680 MHz – 840.680 MHz paired with 880.680 MHz – 885.680 MHz.

In terms of RF coverage, a radius of approximately 20 km is anticipated.

For further information regarding this letter of intent, please do not hesitate to contact the undersigned at (514) 693-8949 ext. 205 or Arthur Gottlieb at (416) 782-2750.

Cordially,

**Benoit Fleury**  
Lynx Mobility
