Re: Notice No. SMSE-005-17: Proposed Revisions to the  
Canadian Table of Frequency Allocations dated 26 August 2017

22 October 2013

Dear Sir,

The Marconi Radio Club of Newfoundland (MRCN) are grateful for the opportunity to comment on the proposed revisions. MRCN have conducted experiments since 2002 under the call signs VO1MRC and VX9MRC for research and to support the Radio Amateurs of Canada in seeking an international Amateur allocation in the vicinity of 5 MHz. MRCN support the proposed changes but noting there has been no report of harmful interference from our operations, believe the restrictions on ERP should be eased. We express concern about the apparent loss of or exclusivity of Amateur allocations above 148 MHz in these proposed revisions.

Sincerely

J. Craig
