## Milk River Cable Club

Box 698

Milk River, Alberta T0K 1M0  
403-647-2115

March 12, 2008

Axia NetMedia Corporation  
3300, 450 1<sup>st</sup> Street SW  
Calgary, AB T2P 5H1

Dear Mr. Vic Haddad,

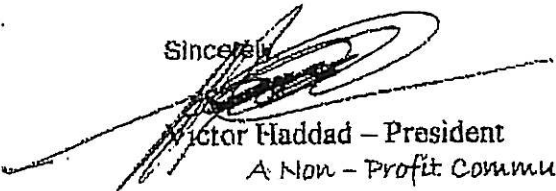

I am writing further to our conversation regarding the approval by the Canadian Radio-television and Telecommunications Commission (the "CRTC") of the use by TELUS Communications Company ("TCC") of deferral account funds to subsidize TCC's provision of broadband services in the following Alberta community in competition with Milk River Cable Club: Coufcs.

Milk River Cable Club has been providing broadband services since September 7<sup>th</sup> 2007 to the community listed above using cable and Alberta SuperNet transport services. Milk River Cable Club's services are available throughout the entire area of this community.

- The service that Milk River Cable Club provides is a 2Mbps high-speed internet connection for \$30/month. Milk River Cable Club's network is up and running 99.99% of the time.

Milk River Cable Club was not aware of the Commission's process in respect of the use of deferral account funds until after release of the decision following discussions with Axia. Subsidized entry by TCC in the community served by Milk River Cable Club will severely compromise Milk River Cable Club's unsubsidized investment and its ability to provide service, and is not an appropriate use of public funds. Therefore, Milk River Cable Club fully supports Axia's request for a review and variance of Decision 2008-1 and rescission of the CRTC's approval for the use by TCC of deferral account funds to serve the community served by Milk River Cable Club.

Sincerely,

Victor Haddad - President

*A Non-Profit Community Owned Society registered in Alberta*

March 12, 2008

Axia NetMedia Corporation  
3300, 450 1<sup>st</sup> Street SW  
Calgary, AB T2P 5H1

Dear Mrs. April Wallgren,

I am writing further to our conversation regarding the approval by the Canadian Radio-television and Telecommunications Commission (the "CRTC") of the use by TELUS Communications Company ("TCC") of deferral account funds to subsidize TCC's provision of broadband services in the following Alberta communities in competition with Platinum Communications: Elkwater, Morinville and Stirling.

Platinum Communications has been providing broadband services in Elkwater since November 22, 2007, Morinville since October 2<sup>nd</sup>, 2007 and in Stirling since March 6, 2007 using point-to-point and point to multi-point wireless technology and SuperNet transport services. Platinum Communications' services are available throughout the entire area of these communities.

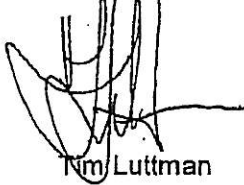

The services that Platinum Communications provides are a 2Mbps – 5Mbps wireless internet service ranging from \$39.95/month - \$54.95/month. More information on these services can be found at: <http://www.platinum.ca/services/wireless-internet-service/>

Platinum Communications network is up and running 99.9% of the time.

Platinum Communications was not aware of the Commission's process in respect of the use of deferral account funds until after release of the decision, following discussions with Axia. Subsidized entry by TCC in the communities served by Platinum Communications will severely compromise Platinum Communications' unsubsidized investment and its ability to provide service, and is not an appropriate use of public funds. Therefore, Platinum Communications fully

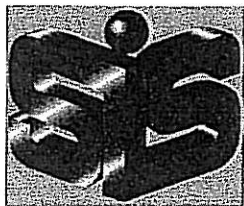

supports Axia's request for a review and variance of Decision 2008-1 and rescission of the CRTC's approval for the use by TCC of deferral account funds to serve the communities served by Platinum Communications.

Sincerely,

A handwritten signature in black ink, appearing to read 'Tim Luttmann', with a horizontal line extending to the right.

Tim Luttmann

VP, Network Services

March 18, 2008

**Axia NetMedia Corporation**  
**3300, 450 1<sup>st</sup> Street SW**  
**Calgary, AB T2P 5H1**

Dear Mrs. April Wallgren

I am writing further to our conversation regarding the approval by the Canadian Radio-television and Telecommunications Commission (the "CRTC") of the use by TELUS Communications Company ("TCC") of deferral account funds to subsidize TCC's provision of broadband services in the following Alberta communities in competition with SIS Strategic Information Systems Inc.(SIS): Hobbema and Gift lake.

SIS has been providing broadband services in Hobbema since October 3<sup>rd</sup> 2006 and in Gift Lake since August 17, 2007, using point-to-point and point to multi-point wireless technology and SuperNet transport services. SIS's services are available throughout the entire area of these communities.

The service that SIS provides is a 1Mbps full-duplex wireless internet service for \$59/month for broadband service. Our network is up and running 99.9% of the time.

SIS was not aware of the Commission's process in respect of the use of deferral account funds until after release of the decision, following discussions with Axia. Subsidized entry by TCC in the communities served by SIS will severely compromise SIS's unsubsidized investment and its ability to provide service, and is not an appropriate use of public funds. Therefore, SIS fully supports Axia's request for a review and variance of Decision 2008-1 and rescission of the CRTC's approval for the use by TCC of deferral account funds to serve the communities served by SIS.

Sincerely,  
SIS Strategic Information Systems

March 12, 2008

Axla NetMedia Corporation  
3300, 450 1<sup>st</sup> Street SW  
Calgary, AB T2P 5H1

Dear April Wallgren,

I am writing further to our conversation regarding the approval by the Canadian Radio-television and Telecommunications Commission (the "CRTC") of the use by TELUS Communications Company ("TCC") of deferral account funds to subsidize TCC's provision of broadband services in the following Alberta community in competition with Serbernet: McLennan.

Serbernet has been providing broadband services since August 18, 2006 to the community listed above using point-to-point and point-to-multipoint wireless technology and SuperNet transport services. Serbernet's services are available throughout the entire area of this community.

- Serbernet provides a wireless high-speed internet service of 2Mbps of upload and 6Mbps of download for \$40-\$60/month. For further information on rates and packages, please refer to our website: <http://www.serbernet.com>. Serbernet's network is up and running 99.99% of the time.

Serbernet was not aware of the Commission's process in respect of the use of deferral account funds until after release of the decision following discussions with Axia. Subsidized entry by TCC in the community served by Serbernet will severely compromise Serbernet's unsubsidized investment and its ability to provide service, and is not an appropriate use of public funds. Therefore, Serbernet fully supports Axia's request for a review and variance of Decision 2008-1 and rescission of the CRTC's approval for the use by TCC of deferral account funds to serve the community served by Serbernet.

Sincerely,

Bison Wireless Ltd.  
Box 509  
Hines Creek, Alta.  
T0H 2A0

Axia Netmedia Corporation  
3300, 450 1st Street SW  
Calgary, Alberta. T2P 5H1

Dear April Wallgren

I am writing further to our conversation, regarding the approval by the CRTC of the use by TELUS Communications Company of deferral account funds to subsidize TELUS to provide broadband services in the following Alberta community in competition with BISON WIRELESS LTD., in the community of HINES CREEK, ALBERTA.

Bison Wireless Ltd. has been providing broadband services since January 9<sup>th</sup>, 2007 to the community listed above using point to point and point to multipoint high-speed wireless technology and SuperNet transport services. Bison Wireless Ltd. is providing our entire community with high-speed wireless technology starting at 39.95 per month. We are providing residential and business packages with upload speeds of 2 megs and download speeds of 5 megs with our network up and running 99.99% of the time.

Bison Wireless Ltd. was not aware of the Commission's process in respect of the use of deferral account funds until after the release of the decision following discussions with Axia. Subsidized entry by TELUS in the community served by Bison Wireless Ltd. will severely compromise our unsubsidized investment and its ability to provide service and is not an appropriate use of public funds. Therefore, Bison Wireless Ltd. fully supports Axia's request for a review and variance of Decision 2008-1 and rescission of the CRTC's approval for the use by TELUS of deferral account funds to serve the community served by BISON WIRELESS LTD. of Hines Creek, Alberta.

Sincerely,

*Len Kuehbaumer March 14/08*

**AB North.com Internet Services**  
A Division of Double F & Company Ltd.  
Box 1577, Grimshaw, AB T0H 1W0  
Ph: 780-332-4390 Fax: 780-332-1655

March 12, 2008

Axia NetMedia Corporation  
3300, 450 - 1<sup>st</sup> Street SW  
Calgary, AB T2P 5H1

Dear Mrs. April Wallgreen,

I am writing further to our conversation regarding the approval by the Canadian Radio Television and Telecommunications Commission (the "CRTC") of the use by Telus Communications Company ("TCC") of deferral account funds to subsidize TCC's provision of broadband services in the following Alberta communities in competition with AB North.com Internet Services ("AB North"): Berwyn, Dixonville and Whitelaw.

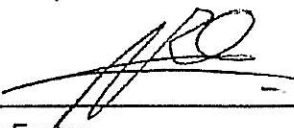

AB North has been providing broadband services since January 20<sup>th</sup>, 2007 to each of the communities listed above using point to point and point to multi-point wireless technology and SuperNet transport services. AB North's broadband services are available throughout the entire area of these communities.

The service that we provide is a 1Mbps full duplex wireless broadband Internet connection for a flat rate of \$50/month.

AB North was not aware of the Commission's process in respect of the use of deferral account funds until after the release of the decision, following discussions with Axia. Subsidized entry by TCC in the communities already served by AB North will severely compromise AB North's unsubsidized investment and its ability to provide service, and is not an appropriate use of public funds.

Therefore, AB North fully supports Axia's request for a review and variance of Decision 2008-1 and rescission of the CRTC's approval for the use by TCC of deferral account funds to serve the communities already served by AB North.

Sincerely,

  
\_\_\_\_\_  
Ken Foster,  
President

Dear Mrs. April Walgren,

I am writing to further our conversation regarding the approval by the Canadian Radio-television and Telecommunications Commission (the "CRTC") of the use by TELUS Communications Company ("TCC") of deferral account funds to subsidize TCC's provision of broadband services in the following Alberta community in competition with Fatbanana Broadband: Gleichen. Fatbanana Broadband has been providing broadband services since April 20<sup>th</sup> 2007 to the community listed above using point-to-point and point-to-multipoint wireless technology and SuperNet transport services. Fatbanana's broadband services are available throughout the entire area of this community.

- Also attached to this letter is a description of Fatbanana Broadband's terms of service including current rates and speeds (upload and download) for broadband service. Fatbanana Broadband's network is up and running 99.99% of the time.

Fatbanana Broadband was not aware of the Commission's process in respect of the use of deferral account funds until after release of the decision following discussions with Axia. Subsidized entry by TCC in the community served by Fatbanana Broadband will severely compromise Fatbanana Broadband's unsubsidized investment and its ability to provide service, and is not an appropriate use of public funds. Therefore, Fatbanana Broadband fully supports Axia's request for a review and variance of Decision 2008-1 and rescission of the CRTC's approval for the use by TCC of deferral account funds to serve the community served by Fatbanana Broadband.

Sincerely,

Rob Grisdale

Calgary, AB T2P 5H1

Dear April Wallgren,

I am writing further to our conversation regarding the approval by the Canadian Radio-television and Telecommunications Commission (the "CRTC") of the use by TELUS Communications Company ("TCC") of deferral account funds to subsidize TCC's provision of broadband services in the following Alberta community in competition with Prairie Wireless in the community of Jousard.

Prairie Wireless has been providing broadband services since August 4<sup>th</sup> 2006 to the community listed above using point-to-point and point-to-multipoint wireless technology and SuperNet transport services. Prairie Wireless' services are available throughout the entire area of this community.

- Prairie Wireless provides residential and business high speed wireless internet. The residential package is \$40/month for 1Mbps of full-duplex bandwidth and the business package is \$90/month for 2Mbps of full-duplex bandwidth. Prairie Wireless' network is up and running 99.99% of the time.

Prairie Wireless was not aware of the Commission's process in respect of the use of deferral account funds until after release of the decision following discussions with Axia. Subsidized entry by TCC in the community served by Prairie Wireless will severely compromise Prairie Wireless' unsubsidized investment and its ability to provide service, and is not an appropriate use of public funds. Therefore, Prairie Wireless fully supports Axia's request for a review and variance of Decision 2008-1 and rescission of the CRTC's approval for the use by TCC of deferral account funds to serve the community served by Prairie Wireless.

Sincerely,

Joel MacLean / Owner: Prairie Wireless
