**Subject:** cities and towns need wired infrastructure  
**Sent:** 2024-06-20 8:20:53 AM

---

Please don't launch more satellites into our atmosphere creating more space junk. Wireless technology produces radiation that is harmful to all life. Bears and racoons do not need telecom services to conduct business. There are safer wired options invented that should be more implemented in cities and towns. <https://satmap.space/>

## Satmap

This satellite map displays real-time location of satellites and constellations.
